Background of the International Standardization Symposium

- *International Standards can be useful tool to achieve Safety, Health and Well-being(SHW).*
- *Standardization aimed at SHW are underway in various TCs in ISO and IEC.*
 - **ISO/TC 283 Occupational health and safety management,**
 - **ISO/TC314 Aging Society,**
 - **IEC SyC AAL (Active Assisted Living)**
 - **IEC ACOS (Advisory Committee on Safety).**
- *Recent advances in IT and robotics technology will, also, support the concept of “collaborative safety” and Safety 2.0 .*
- *This Symposium will be co-organized by **JSA and IGSAP.***

Outline of the International Standardization Symposium

1. *Date and Place; 16th, July, at Osaka, EXPO2025 in Expo Salon.*
2. *Outline; the symposium covers various topics on SHW and international standardization.*
3. *Tentative contents*
 - *The potential of international standards contributing to SHW,*
 - *Progress in discussions on various international standardization, such as OHS MS, Aging Society and IEC SyC AAL and ACOS, and their impacts*
 - *Furthermore, expectations for future technological innovation in IT and Robotics technology and its impacts on safety issues.*
4. *Expected Speakers; Occupational safety experts, ISO and IEC executives, and Standardization experts and more.*
